

# 2596626 - SLD SH: Changing infotype period causes duplicated RECORD\_SEQ

Version	2	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	05.02.2018
Component	PY-ES ( Spain )		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2596626>

## Symptom

You have two entries in the Gestión de estados (ES)(3393) infotype, both with the same Período para (FOR\_PER\_MONTH and FOR\_PER\_YEAR) and Período En (IN\_PER\_MONTH and IN\_PER\_YEAR) fields and same Numero de Registro(RECORD\_SEQ) field, which should not happen.

### EXAMPLE:

You create two entries for the period of January. Modify the period of the one with RECORD\_SEQ equal to 2 to February. This will change its RECORD\_SEQ to 1. Now modify the period of the January entry with RECORD\_SEQ equal to 1 to February as well. The RECORD\_SEQ will still be equal to 1, leaving two entries with the same RECORD\_SEQ (1) in the same period (February), which is wrong.

## Other Terms

&SLD, SH (for more information, see SAP Note [1071282](#))

## Reason and Prerequisites

The FOR\_PER\_MONTH, FOR\_PER\_YEAR, IN\_PER\_MONTH and IN\_PER\_YEAR fields should not have been possible to modify after the creation of the entry.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 31
6.04	HR SP A3
6.00	HR SP D7

(For more information, click "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

## Solution

From now on, the FOR\_PER\_MONTH, FOR\_PER\_YEAR, IN\_PER\_MONTH and IN\_PER\_YEAR fields are now uneditable after creation. If you need to edit the period, delete the entry and create a new one with the correct period.

The MV\_EDIT\_MODE attribute and SET\_EDIT\_MODE method were added to the CL\_HRPADES\_UI\_3393 class to indicate whether the entry was being created or modified.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
1	February 05, 2018	Released for Customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
