Symptom

There were some differences found between releases for the SLD: fichero de bases (RPC_PAYES_CRETA_BASES) report.

Other Terms

&SLD - PC00_M04_CRETA_BASES (for more information, see SAP Note [1071282](#))

Reason and Prerequisites

Former SAP Notes have delivered small source code differences between releases.

You have to apply SAP Note [2598786](#) as prerequisite (only relevant for SAP HRCES 6.00).

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 31
6.04	HR SP A3
6.00	HR SP D7

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

From now on, all the system releases should have the same source code.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual pre-implementation steps (only relevant for SAP HRCES 6.00).
2. Use Note Assistant (SNOTE) to implement the correction instructions.

List of created (C) / modified (M) objects (manual activities related) (only relevant for SAP HRCES 6.00):

(M) REPT RPC_PAYES_CRETA_BASES

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
