Symptom

You run the Certific@2 (RPCRT2E0) report with the Periodos de Actividad(P_OPERE) option selected for an employee with an absence in Absentismos (2001) infotype configured as Vacaciones(V) in Clases de absentismos y presencias (T554S) view. In the file generated by the report, the <Codigo_Actividad>XML element is filled with '05', which does not correspond to vacations.

Reason and Prerequisites

The available values for <Codigo_Actividad>tag have been updated, as specified in the Periodos de Actividad technical manual. When reporting vacations, the value '05' (Vacaciones y Descansos retribuidos) was updated to '06' (Vacaciones anuales retribuidas (excluidas del pago de la prestación)).

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

| Release | Support Package |
|---------|-----------------|
| 6.08 | HR SP 19 |
| 6.04 | HR SP 91 |
| 6.00 | HR SP C5 |

Solution

After applying this SAP Note, when reporting vacations in Periodos de Actividad file, the value 06 will be used to fill <Codigo_Actividad>XML element.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

| Version | Date | Reason |
|---------|----------------|----------------------------|
| 3 | March 02, 2017 | Note released to customers |

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
