| Component | PY-ES (Spain) | | |

Please find the original document at <https://launchpad.support.sap.com/#/notes/2461182>

Symptom

When running the Evaluación de respuestas del Certific@2 (RPURT2E0) report, the SAPSQL_SQLS_INVALID_CURSOR short dump appears.

Other Terms

&CRT2 - PC00_M04_RPURT2E0 (for more information, see SAP Note [1071282](#))

Reason and Prerequisites

The RPURT2E0 report was using the Obtener el número de personal a partir del NAF (HR_E_GET_PERNR_FROM_NAF) function module instead of the Clase de utilidad para encontrar PERNR por NAF (CL_HRPADES_EE_FINDER_FACTORY) class.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

| Release | Support Package |
|---------|-----------------|
| 6.08 | HR SP 21 |
| 6.04 | HR SP 93 |
| 6.00 | HR SP C7 |

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

From now on, the RPURT2E0 report will not generate the SAPSQL_SQLS_INVALID_CURSOR short dump due to the usage of the CL_HRPADES_EE_FINDER_FACTORY class.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

| Version | Date | Reason |
|---------|--------------|-----------------------------|
| 2 | May 17, 2017 | Note released to customers. |

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under <https://support.sap.com/kb-incidents/notes/assistant.html>.
