

# 2620601 - CONTRAT@: Error list from response file not being read

Version	2	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	21.03.2018
Component	PY-ES ( Spain )		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2620601>

## Symptom

You run the Evaluación de respuestas del SEPE (RPUINEE0) program for a file with content in the <ERRORES> xml tag. The Elementos contrato (0016) infotype entry related to this contract is not being updated with the error messages from the response file.

## Other Terms

&CONTRAT@ - PC00\_M04\_RESP\_INEM (for more information, see SAP Note [1071282](#) - CONSULT: List of tags for Spain notes.)

## Reason and Prerequisites

When reading the contents of the <ERRORES> tag from the XML file, the RPUINEE0 program is expecting a single <ERROR> xml tag instead of a table.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 32
6.04	HR SP A4
6.00	HR SP D8

(For more information, click "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

## Solution

The XML schema generator has been changed to identify the scenarios where the maxOccurs attribute from the XSD is inside the first element of the <xsd:sequence> tag instead of the being in the tag itself.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be

changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
2	March 21, 2018	SAP note released for customers.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).

Software Components

Software Component	Release
SAP_HRCES	600 - 600
SAP_HRCES	604 - 604
